Dear Messrs. Day and Jansen:

REVISION 2 OF THE REMEDIAL INVESTIGATION PHASE 2 SUPPLEMENTAL WORK PLAN FOR THE HANFORD SITE, 1100-EM-1 OPERABLE UNIT

Copies (5 each) of Revision 2 of the Remedial Investigation Phase 2 Supplemental Work Plan for the Hanford Site 1100-EM-1 Operable Unit (DOE/RL-90-37) are enclosed. This document, being provided at this time primarily to comply with formal record requirements, incorporates all comment and comment dispositions, including internal Department of Energy, Richland Field Office (RL) and Siemens Nuclear Power Corporation (SNP) comments resulting from the distribution and parallel review (regulatory/RL/Siemens) of the Revision 2 draft transmitted to you on January 15, 1992. All comments, including the RL and SNP comments, and our disposition of those comments were provided and discussed with respective Unit Managers from your Agencies.

You should note that most of the work documented in the plan has already been completed, in all cases in consultation with your respective Unit Managers. As stated, the primary reason, for issuance of the plan at this time is for formal record purposes. The plan documents the work and supporting activities for the Phase 2 Remedial Investigation, including that negotiated as a result of the 1100-EM-1 Dispute.
